PILAFLONTM **PFA Bending Tube**

PFA tubes are bent in our own factory

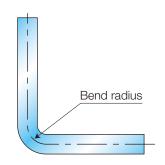

Features

Using Super-Clean New PFA tubes

Integrated production is implemented in our own factory cleanrooms compliant with ISO 9001 and ISO 14001, which means that clean and high-quality bent tubes are produced.

■ Manufacturable range

			Unit: mm	
Manufacturable size			Manufacturable bend radius	Maximum operating temperature
Tube nominal size		Tube size	bena radius	temperature
mm	φ4	φ4×φ3	20	150℃
	φ6	φ6×φ4	20	
	φ8	φ8×φ6	30	
	φ10	φ10×φ8	35	
	φ12	φ12×φ10	45	
	φ19(W6)	φ19×φ15.8	80	
	φ25	φ25×φ22	160	
inch	W2	φ6.35×φ3.95	30	150°C
	W3	φ9.53×φ6.33	35	
	W4	φ12.7×φ9.5	45	
	W8	φ25.4×φ22.2	160	

Note: We may be able to manufacture PFA tubes with bend radii not shown in the table above. Please consult with us separately.

■ Notes on manufacturing

- Limitation on bent tube length
 We cannot manufacture any tube exceeding 2,700 mm.
- Size restriction when bent portions are adjacent to each other There are cases where a straight section is required between bent portions.

We may be able to manufacture PFA tubes outside the above range, depending on the combination of tube size, the shape of the overall bent tube, and bending angle. Please consult with us separately.

■ Welded PFA piping

In addition to bent tubes, we can also provide welded PFA tubes. We weld PFA tubes by using our own welding technology, and there are no beads on both the inner and outer surfaces of welded portions.
